🏠 Pokhara

Professional Summary

Results-driven Full Stack Software Engineer with expertise in Java, Spring Boot, Angular, and relational databases. Skilled in developing scalable backend solutions and designing RESTful APIs for high-performance applications. Experienced in integrating modern web technologies, enhancing user experience, and optimizing system performance. Passionate about continuous learning and adapting emerging technologies in software development to create impactful, user-centric solutions.

Technical Skills

- **Languages:** Java, JavaScript, Python, C, C++
- **Backend Technologies:** Spring Boot, RESTful APIs, JWT Authentication, Spring Security, Hibernate
- **Frontend Technologies:** Angular, HTML5, CSS3, Bootstrap, JavaScript, JSON
- **Databases:** MySQL, PostgreSQL
- **Web Servers:** Apache Tomcat
- **Cloud & DevOps:** Docker
- **Version Control:** Git, GitHub
- **Methodologies:** Agile (Scrum), Waterfall
- **Tools:** IntelliJ IDEA, Visual Studio Code, Postman, Maven
- **Machine Learning:** TensorFlow, Deep Learning, Supervised Learning
- **Coding Platforms:** [Leetcode](#) (100+ questions solved in Java)

Key Projects

Online Book Store

- Designed RESTful APIs for seamless communication between the frontend (Angular) and backend (Spring Boot).
- Implemented user authentication and authorization using Spring Security, ensuring secure access control.
- Integrated MySQL for managing product listings, orders, and customer data.
- Integrated Khalti payment gateway for secure transactions, enabling efficient online payments.
- Source Code: [Backend](#) — [Frontend](#)

Quiz Web Application

- Developed using Spring Boot (backend) and Angular (frontend), facilitating interactive quiz sessions.
- Implemented secure user authentication with JWT, enhancing security and session management.
- Integrated dynamic UI components and RESTful APIs to enable real-time quiz interactions.
- Source Code: [Backend](#) — [Frontend](#)

Book Library Application

- Built with Spring Boot and Angular, providing users the ability to borrow, return, and manage books.
- Implemented JWT Authentication for secure user login and role management.
- Used PostgreSQL to store book records, transaction history, and user data.
- Deployed in Docker containers for consistent testing, development, and production environments.
- Source Code: [Backend](#) and [Frontend](#)

Machine Learning Project

Pneumonia Detection and Localization

- Developed a deep learning model using TensorFlow to detect and classify pneumonia from X-ray images.
- Designed a FastAPI backend API to deploy the model for real-time predictions.
- Integrated an Angular frontend to allow users to upload X-ray images and view the results.
- Achieved high accuracy through model tuning, data preprocessing, and augmentation.
- Source Code: [Backend](#) — [Frontend](#)

Education

B.E. Computer Engineering: Institute of Engineering (IOE), Paschimanchal Campus *March 2021 - March 2025*

High School (10+2): Chhorepatan Secondary School (Science Stream) *March 2020*

Academic Achievements

- 100% scholarship for academic excellence up to 10th grade.
- Achieved a GPA of 3.85 in High School (10th grade).
- Scored a GPA of 3.65 in 10+2 (Science Stream).
- Secured 78% in Bachelor's (B.E. Computer Engineering) to date.
